Education

B.Tech, Computer Science & Engineering (AI & ML), *Kalasalingam Academy of Research and Education*
08/2025 – 06/2029
CGPA: 8.73/10

Experience

Artificial Intelligence Intern, *XTRAGRAD*
07/2026 | Remote

- Built VisionGuard AI, an explainable image-authenticity detection platform using an EfficientNet-B0 classifier, achieving ~96–97% validation accuracy.
- Implemented Grad-CAM explainability visualizations and a FastAPI backend to serve real-time authenticity predictions to a React/Tailwind CSS frontend.
- Containerized and deployed the system with Docker on AWS, using PostgreSQL to persist prediction and audit data.

Technical Skills

Languages — Python, C, SQL, JavaScript, TypeScript
AI/ML — Generative AI, LLMs, AI Agents, RAG, Prompt Engineering, Machine Learning, Semantic Search, Embeddings
Frameworks — React, Next.js, FastAPI, Streamlit, Tailwind CSS
Data/Backend — PostgreSQL, Supabase, FAISS, Prisma
Cloud/Tools — Git, GitHub, AWS, Docker, Vercel, Netlify

Summary

B.Tech CSE (AI & ML) student building Generative AI and AI-agent applications end-to-end — from Gemini-powered agents and semantic search to deployed full-stack systems — with AI internship experience and Team Lead honors at Smart India Hackathon 2025.

Projects

Talent Intelligence Ranker

- Engineered a semantic candidate-screening engine using FAISS vector retrieval and Sentence Transformer embeddings to rank large candidate pools against job requirements.
- Built a recruiter-facing Streamlit dashboard with Pandas/NumPy scoring pipelines for real-time semantic search over resume data.

ResearchAI NEXUS OS,
Next.js, TypeScript, Gemini, D3.js, Context.dev

- Orchestrated a multi-hop autonomous research agent using the Gemini API and Context.dev to synthesize structured findings across sources.
- Designed an interactive knowledge-graph visualization with D3.js and Recharts to present agent-generated research pathways.

AI Resume Analyzer, *Python, FastAPI, Gemini API, React, Docker*

- Developed a FastAPI backend integrating the Gemini API for structured resume parsing, ATS scoring, and job-description keyword-gap detection.
- Deployed a Dockerized full-stack application with a React/Vite frontend for automated resume-to-JD matching analysis.

Achievements

- Smart India Hackathon (SIH) 2025 — Grand Finale, Team Lead: led a multidisciplinary team through a national-level problem statement to the Grand Finale stage.
- Hackathons: Bharatiya Antariksh Hackathon (BAH) 2026 | Coimbatore Innovation Hackathon (CIH) 2026
